Madrid, Spain

PROFESSIONAL SUMMARY

Master of Applied Economics student at IE university, MSc in Ecological Economics at the University of Edinburgh, with research interests in international economic trade issues and sustainable economic development. Rich experience in analyzing geographic data and historical data with software including STATA, ArcGIS and R.

EDUCATION

IE University Master of Applied Economics Full scholarship from China Scholarship Council	Madrid, Spain Sep 2022 - Now
University of Edinburgh MSc in Ecological Economics	Edinburgh, UK Sep 2020 - Aug 2021
Wuhan University of Technology BSc in Economics GPA: 88.65/100 Graduation paper: Excellence (95%)	Wuhan, China Sep 2016 - Jun 2020
University of California, Riverside Exchange Programme (4.0/4.0)	Riverside, US Sep 2018 - Jun 2019

RESEARCH EXPERIENCE

Wuhan univeristy School of Economics and Management Full time research assistant – Used STATA and R to analyze the data. – Wrote final documents for research projects funded by the Ministry of Education of China, Decoupling and recoupling China and the United States. – Completed an academic paper and are preparing for submission, which is expected to be submitted to the Journal of Ecological Economics in January.	Wuhan, China Nov 2021 - Aug 2022
Wuhan univeristy Satellite Navigation and Positioning Technology Research Center Full time research assistant – Used STATA and ArcGIS to analyze the data. – Wrote a consultancy report for The State Council of China to evaluate the effects of U.S. sanctions on Russia based on night-time light maps and DID. – Wrote a consultancy report for the Ministry of Food in China to evaluate the effects of subsidies given to farmers on agricultural production based on remote sensing data on crop acreage, RDD and DID.	Wuhan, China Sep 2021 - Nov 2021

PROJECTS EXPERIENCE

Data analysis and R language practice based on applied econometrics workshop	Online Sep 2022 - Nov 2022
---	-------------------------------

- Taught by Yale University professor E.J.V.
- Used R language to clean and make graph of dataset [PROGRESA](#).
- Followed the papers of [Card and Krueger \(1994\)](#) and [Agan and Starr \(2018\)](#) to programme DID and DDD codes of R language.
- Used the data of [Cai \(2016\)](#), linear regression and DID to study the impact of agricultural insurance programs in China.

Preference and Rational Choice: Behavioral Economics and Behavioral Decision Analysis workshop

Online

Sep 2022 - Nov 2022

- Taught by Cambridge University Professor E.G.
- Wrote a literature review on the relationship between the law of small numbers, the gambler's fallacy and the hot hand fallacy.
- Researched the application of representativeness heuristic and farming effect on hotel advertising was studied based on the experimental design of [Cain et al. \(2021\)](#).
- Researched the occurrence probability of representativeness heuristic in research team decisions and individual decisions based on the experimental design and data of [Houghton et al. \(2000\)](#).

Workshop on International Trade and Labor Economics

Wuhan, China
Nov 2021 - Aug 2022

- Taught by Wuhan University Professor R.G.
- Researched two-way fixed effects and differences in differences estimators with several treatments.
- Researched theory and applications of Non-Random Exposure to Exogenous Shocks.

Baidu Computer vision technology and image processing technology competition

Online

Sep 2022 - Nov 2022

- Through algorithms and other knowledge technologies, my collaborators and I help people to restore the blurred images due to magnification, improve the resolution of the pictures, and realize the "lossless magnification" of the document images to make pictures play their role again.

WORKING PAPER

Zheng Yu*, **Yuxiang Xiong**, Xuechun Wang. *Exposure to Chinese imports and biodiversity: Evidence from U.S. Biodiversity survey over 1990–2007.*

This paper follows [Autor et al. \(2013\)](#), [Acemoglu \(2016\)](#), [Pierce & Schott \(2016\)](#), which took China's entry into the WTO as an exogenous shock and studied whether the biodiversity changed after the US manufacturing was transferred. The biodiversity data in this paper came from the North American bird survey. I used ArcGis to construct three kinds of biodiversity indicators.

Quan Xiao, **Yuxiang Xiong***. *Empirical study of the finance benefit policy impact on agriculture development: Evidence from China.*

This paper regards subsidies to farmers as a quasi-natural experiment to study the changes of agricultural production before and after the policy. We use three indicators of total factor productivity, green total factor productivity and crop area to measure agricultural production, and discuss the environmental effects of this policy in further analysis.

Yuxiang Xiong. *No one lends a helping hand in the flood, is the lack of wealth transfer the reason for the rise in unemployment? Evidence from USA.*

This paper follows [Campante, F. R., & Do, Q. A. \(2014\)](#). I used the distance between counties and the

state capital and DC as an instrumental variable. The paper studied the externality of wealth transfer as a public good to research the counties that receive wealth transfer will or not improve the employment rate.

INTERNSHIP EXPERIENCE

Dongguan Securities Co., Ltd.

Beijing, China

Fund manager assistant

Jun 2020 - Oct 2020

- The company was established in 1988 with a registered capital of RMB 1.5 billion. It is a state-controlled, national comprehensive securities company and one of the first underwriting sponsors in China.
- Developed financial plans based on clients' financial status to discuss investment options.
- Used python and time series analysis to predict prices in the secondary market.

Zhonglun W&D Law Firm

Changsha, China

Administrative Manager

Mar 2022 - Now

- The firm is one of the first partnership law firms approved by the ministry of justice of China. It ranks sixth in the 2019 Asia 50 Law firms list released by The American Lawyer. It has been responsible for the Beijing Olympic games and the Asian Infrastructure Investment Bank.
- Contacted government departments, especially those related to environment, economy and tax.
- Reviewed ESG reports of individual companies in the business.
